Art Unit: 2873

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, 20-31, 55-60, 62, drawn to displaying images and a grayscale using micromirrors and analog and digital modulation, classified in class 359, subclass 291.
  - II. Claims 18, 19, 32-54, 61, 63, drawn to displaying images and a grayscale using micromirrors without the specific use of analog and digital modulation, classified in class 359, subclass 291.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because creating the grayscale does not need the use of analog and digital modulation. The subcombination has separate utility such as analog and digital modulation of a display signal.

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Hanig whose telephone number is 571-272-2329. The examiner can normally be reached on M-F: 8:00-4:30.
